

PlayStation First-Party OpenCritic Ranking

An ownership-at-release comparison of Sony's internally developed PS4, PS5, PSVR and PSVR2 games, ranked against Marvel's Wolverine.

45	30th	29	13
scored games	Wolverine's joint rank	games above 77	games below 77

The finding

Marvel's Wolverine has an OpenCritic average of 77. In this strict first-party set, 29 games score higher, 13 score lower and two others tie it. That places Wolverine joint 30th out of 45 scored releases: firmly in the lower third, although well clear of Sony's weakest-reviewed internal games.

What counts as first-party?

A release qualifies only when its lead developer was owned by Sony when that version launched. This is deliberately narrower than 'published by PlayStation'. Externally developed Sony-published games are excluded, even when Sony funded them or owns the IP.

- Included: native PS4, PS5, PSVR and PSVR2 releases; internally developed remakes, remasters and collections with their own OpenCritic page; cross-generation releases counted once.
- Excluded: externally developed games, annual MLB releases, DLC and expansions, PC ports, regional publishing arrangements, backwards-compatible classics, demos and unreleased games.
- Ownership is judged at release. Therefore 2016's Ratchet & Clank and 2018's Marvel's Spider-Man are excluded because Insomniac was independent; Miles Morales and later Insomniac games qualify.
- The same rule excludes Returnal because Housemarque joined Sony after it launched, while Saros qualifies. Demon's Souls is excluded because Bluepoint was acquired after release.
